Energy transmission on single wire in 'It Is Quite Another Electricity'

Author Michael Bank proposes wire system to cut back energy cost

JERUSALEM – In this modern day and age, electricity has become an indispensable necessity. But somehow, there is still a problem in distributing energy. “It Is Quite Another Electricity” ([published by Partridge Singapore](#)), authored by Michael Bank, offers methods to reduce cost of electricity.

The book gives a modern representation about electric current; it is shown that a Single-Line Electricity (SLE) method can be used to transmit signals of any frequency including direct current and without any additional losses. The book gives a possible explanation of the grounding effect. It is proposed in the book a new kind of antenna (MB antenna) which uses single line method.

“It Is Quite Another Electricity” proposes system can be applied to a three-phase transmission signal and to collect energy from the “green” sources. The book also describes in detail the energy transfer on the underground and underwater lines. The book gives detailed comparison between SLE and known SWER system.

The author hopes that his book will be distributed in libraries of all universities and firms which develops and manufactures electricity equipment for the benefit of students, professors in the field of electricity theory and engineers in the electrical industry.

“It Is Quite Another Electricity”

By Michael Bank

Hardcover | 6x9in | 112 pages | ISBN
9781482883367

Softcover | 6x9in | 112 pages | ISBN
9781482883350

E-Book | 112 pages | ISBN 9781482899924

Available at Amazon and Barnes & Noble

6 kV single line system
without grounding near
from Jerusalem

About the Author

Michael Bank graduated from the University of Communications in St. Petersburg. After that, he received the title of doctor and then a professor. Prior to this book, he published five books, more than 120 articles and received more than 30 patents. In 1992, Bank immigrated to Israel where he currently works as a professor and heads the firm “Manfred.”

Partridge Singapore, an imprint in partnership with Penguin Random House Singapore, aims to help writers in Singapore, Malaysia, and the rest of Southeast Asia become published authors. Partridge Singapore gives authors in the region direct access to a comprehensive range of expert publishing services that meet industry standards but are more accessible to the market. For more information or to publish a book, visit www.partridgepublishing.com/singapore or call 800 101 2657 (Singapore) or 1 800 81 7340 (Malaysia). For the latest, follow @PartridgeSG on Twitter.
